Here are ways to help your child practice skills while having fun!

Write these words: big, lucky, wet, kind, fast. Have your child add -er or -est to each word and write the new words, as in bigger and biggest.

Your child has been learning to distinguish between fact and opinion. Show your child three different objects. For each object, make a factual statement about the object. Then ask your child to turn the statement of fact into an opinion. For example, this cup is green can be changed to this cup is a pretty color.

Have your child read these words: clothes, hours, money, neighbor, only, question, taught. Help your child write the words in sentences. Ask your child to underline the listed words.

Have your child write these spelling words: busier, busiest, fatter, fattest, happier, happiest, hotter, smaller, smallest, soonest. Use puppets or stuffed animals to act out a conversation using these spelling words.

This week your child learned about facts and opinions. Play a game of Simon says using facts and opinions. Instead of using motions, Simon makes statements of facts and opinion. For example, Simon says, This is a table. For each fact that Simon says, have your child hold up two fingers. For each opinion (for example, The flower is beautiful), have your child form an o with his or her fingers.

"T" Time With Elephants

by Guy Belleranti

Three interesting things about an elephant begin with the letter T – trunk, tusk and teeth.

An elephant's trunk has over forty thousand muscles and tendons. The trunk is a combination of the nose and the upper lip. An elephant uses its trunk for picking things up. It also uses its trunk for smelling.

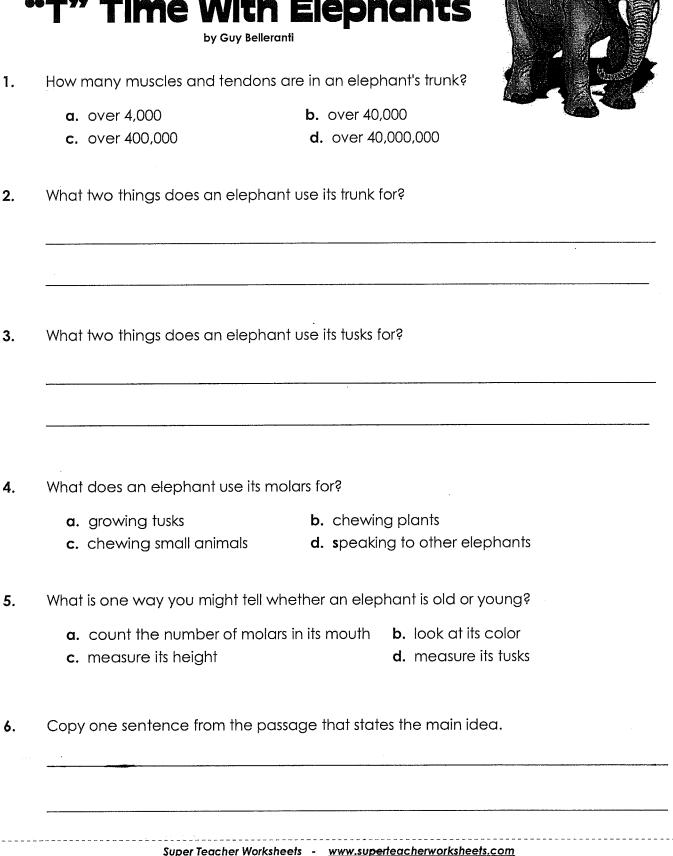

An elephant has two tusks. The tusks are made of ivory. The tusks grow from the elephant's upper jaw. An elephant has these two "teeth" instead of incisor teeth. The tusks grow throughout an elephant's life. An elephant uses its tusks to drill for water and to dig up food.

All African elephants have tusks. Only some Asian male elephants have tusks. Some female Asian elephants also have tusks, but they are very small and hidden inside the mouth.

An elephant also has four other teeth. These teeth are molars. An elephant has one upper molar and one lower molar on each side of its mouth. Because an elephant eats a lot of plants, its molars get ground down. New molars move in to replace the old molars about every ten years. An elephant gets up to six sets of molars over its lifetime.

Rachel Carson

How do we know so much about the ocean? Rachel Carson was a brilliant scientist and writer. She wrote about the ocean in her books *The Sea Around Us* and *The Edge of Sea*. Born in 1907 in Pennsylvania, Rachel's love of nature came at an early age from her mother. Rachel felt it was important to protect Earth's natural resources too. She found that some chemicals were dangerous to living things. They were harming crops and people. She wrote a book called *Silent Spring*. In her book, Rachel warned about the danger of using certain chemicals. At the time, there weren't many women scientists. Some scientists believed Rachel's ideas were wrong. But Rachel fought bravely to protect the natural world. In 1963, she went to the government and asked for new policies to protect people's health and the environment.

I. How do you know this story is a biography?
