<b>Chinese and Math instruction</b>	Classes organized according to homeroom with differentiated instruction offered within	Classes organized in levels with placement of students according to content mastery, maturity, focus and diligence with homework

Parents, your assignment before school starts in the fall is to watch "a short film about a short time in life; **BEFORE** is a 37 minute documentary short that looks at the penultimate **tween** year through the lens of one 5th grade class on the last day of elementary school. It is a funny, moving and sometimes heartbreaking story about the moment when adolescence begins to eclipse childhood." I encourage you to watch it with your middle school kids, as well, at <https://vimeo.com/120373004> I hope it will provide an opportunity to engage in meaningful conversation that will nourish and strengthen your relationships.

Remember almost anything is possible when we partner together for the sake of our kids! Let us understand and apply the 90/10 secret. What is this secret?

10% of life is made up of what happens to you. 90% of life is decided by how you react.

Mrs. Berg
